Custom	

Select SC Digital Camera from the Custom dropdown list.

Acquire Image from Digital Camera

To acquire a photo from a **Digital Camera** select **Image Menu**, then click **Select Source**.

Once you have selected the correct **Image Source** to the **Image type** (*Photo*), select **Acquire** to capture photos using the **SC Digital Camera plug-in**.

The **SC Digital Camera** window is presented to capture images.

SC Digital Camera plug-ins

Place the subject in the image frame until you are happy with the position. Click **Freeze** to take a snapshot.

SC Digital Camera plug-ins

Next you must **crop** the image as required and click **Accept Transfer**.

Click <u>Yes</u> to accept the captured image or <u>No</u> to cancel transferring the image.

Click **Yes**, the photo is now added to your database and bound to a record.

Settings

Settings			
Language:	English 🗸		
BadgeMaker	size: 50%		
ОК	Cancel		

Select your desired language by clicking the Language dropdown menu.

Select a **BadgeMaker Size** from the drop down menu. You can select various sizes to store your photos.

100%	
75%	
50%	
20%	
10%	

Selecting a lower value scales down the image size stored. This is advisable if working with large databases with many images

Zoom In & Zoom Out

Use the slider on the right hand side to **zoom in** and **zoom out** to adjust the image.

If your camera is not connected or switched on, you will receive the following dialog box.

SC Digital Camera	
No Canon Camera detected!	
Please make sure that the camera is powered on and connected to the computer.	
ОК	

Click **OK**, and make sure the camera is powered on and connect to the computer.
